

APPLICATION FOR VARIANCE

State Form 44400 (R6 / 6-12)

Approved by State Board of Accounts, 2012

INDIANA DEPARTMENT OF HOMELAND SECURITY
CODE SERVICES SECTION
302 West Washington Street, Room W246
Indianapolis, IN 46204-2739
http://www.in.gov/dhs/fire/fp_bs_comm_code/

INSTRUCTION: Please refer to the attached four (4) page instructions.
Attach additional pages as needed to complete this application.

Variance number (Assigned by department)

16 - 05 - 07

| | | |
|---|--|-----------------------------|
| 1. APPLICANT INFORMATION (Person who would be in violation if variance is not granted; usually this is the owner) | | |
| Name of the applicant Jacquelyn Espinoza | Title NI Coordinator | |
| Name of organization ThyssenKrupp Elevator | Telephone number (630) 652-4051 | |
| Address (number and street, city, state, and ZIP code) 355 Eisenhower Lane South, Lombard, IL 60148 | | |
| 2. PERSON SUBMITTING APPLICATION ON BEHALF OF THE APPLICANT (If not submitted by the applicant) | | |
| Name of person on behalf of the applicant Same as above | Title | |
| Name of organization | Telephone number () | |
| Address (number and street, city, state, and ZIP code) | | |
| 3. DESIGN PROFESSIONAL OF RECORD (If applicable) | | |
| Name of design professional | License number | |
| Name of organization | Telephone number () | |
| Address (number and street, city, state, and ZIP code) | | |
| 4. PROJECT IDENTIFICATION | | |
| Name of project Regional Mental Health | State project number | County |
| Site address (number and street, city, state, and ZIP code) 320 140th St. Lombard, IL 46383 | | |
| Type of project: | <input checked="" type="checkbox"/> New <input type="checkbox"/> Addition <input type="checkbox"/> Alteration <input type="checkbox"/> Change of occupancy <input type="checkbox"/> Existing | |
| 5. REQUIRED ADDITIONAL INFORMATION | | |
| The following required information has been included with this application (check as applicable): | | |
| <input checked="" type="checkbox"/> A check made payable to the Indiana Department of Homeland Security for the appropriate amount. (see instructions) <input checked="" type="checkbox"/> One (1) set of plans or drawings and supporting data that describe the area affected by the requested variance and any proposed alternatives. <input type="checkbox"/> Written documentation showing that the local fire official has received a copy of the variance application. <input type="checkbox"/> Written documentation showing that the local building official has received a copy of the variance application. | | |
| 6. VIOLATION INFORMATION | | |
| Has the Plan Review Section of the Division of Fire & Building Safety issued a Correction Order? | | |
| <input type="checkbox"/> Yes (if yes, attach a copy of the Correction Order) | | <input type="checkbox"/> No |
| Has a violation been issued? <input type="checkbox"/> Yes (if yes, attach a copy of the Violation and answer the following) <input checked="" type="checkbox"/> No | | |
| Violation issued by: <input type="checkbox"/> Local Building Department <input type="checkbox"/> State Fire and Building Code Enforcement Section <input type="checkbox"/> Local Fire Department | | |

7. DESCRIPTION OF REQUESTED VARIANCE

| | |
|--|---|
| Name of code or standard and edition involved ASME A17.1 2007 | Specific code section 3.19.4.1, 3.19.4.4, 3.19.4.5 and 3.26.8 |
| Nature of non-compliance (<i>include a description of spaces, equipment, etc. involved as necessary</i>) | |

8. DEMONSTRATION THAT PUBLIC HEALTH, SAFETY, AND WELFARE WILL BE PROTECTED

Select one of the following statements:

- Non-compliance with the rule will not be adverse to the public health, safety or welfare; or
- Applicant will undertake alternative actions in lieu of compliance with the rule to ensure that granting of the variance will not be adverse to public health, safety, or welfare. Explain why alternative actions would be adequate (be specific).

Facts demonstrating that the above selected statement is true:

See Attached

9. DEMONSTRATION OF UNDUE HARDSHIP OR HISTORICALLY SIGNIFICANT STRUCTURE

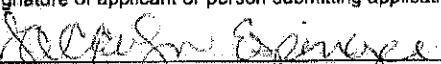

Select at least one of the following statements:

- Imposition of the rule would result in an undue hardship (*unusual difficulty*) because of physical limitations of the construction site or its utility services.
- Imposition of the rule would result in an undue hardship (*unusual difficulty*) because of major operational problems in the use of the building or structure.
- Imposition of the rule would result in an undue hardship (*unusual difficulty*) because of excessive costs of additional or altered construction elements.
- Imposition of the rule would prevent the preservation of an architecturally or a historically significant part of the building or structure.

Facts demonstrating that the above selected statement is true:

10. STATEMENT OF ACCURACY

I hereby certify under penalty of perjury that the information contained in this application is accurate.

| | | |
|--|--|--|
| Signature of applicant or person submitting application  | Please print name Jacquelyn Espinoza | Date of signature (month, day, year) 4/20/16 |
| Signature of design professional (if applicable) | Please print name | Date of signature (month, day, year) |

11. STATEMENT OF AWARENESS (If the application is submitted on the applicant's behalf, the applicant must sign the following statement)

I hereby certify under penalty of perjury that I am aware of this request for variance and that this application is being submitted on my behalf.

| | | |
|------------------------|-------------------|--------------------------------------|
| Signature of applicant | Please print name | Date of signature (month, day, year) |
|------------------------|-------------------|--------------------------------------|

TAC32 H-MRL

Code Deviations

ASME A17.1/B44 requirement

Deviation 1 Shutoff Valve Code

2004 - 3.19.4.1 Shutoff Valve. A manually operated shutoff valve shall be provided between the hydraulic machines and the hydraulic jack and shall be located outside the hoistway and adjacent to the hydraulic machine on all hydraulic elevators.

2007-2010 - 3.19.4.1 Shutoff Valve. A *manually* operated shutoff valve shall be provided between the hydraulic machines and the hydraulic jack and shall be located *outside the hoistway* and adjacent to the hydraulic machine.

Where the hydraulic machine is located in the hoistway, the manually operated shutoff valve shall be permitted to be located inside the hoistway, provided that it is accessible from outside the hoistway to elevator personnel only (see 8.1).

Requested deviation

The manual shutoff valve is replaced with an electronically assisted valve operated by a constant pressure key switch located in the service panel. The service panel is located at the 2nd landing and accessible from outside the hoistway. The service panel has LED indicators to show the states (open/closed) of this electronically assisted shutoff valve. The service panel is accessible only by Type 1 security.

Deviation 2 Manual Lowering Valve Code

2004 - 3.19.4.4 Manual Lowering Valve. A manually operated valve, located on or adjacent to the control valves, shall be provided and identified, which permits lowering the car at a speed not exceeding 0.10 m/s(20 ft/min). This valve shall be so marked to indicate the lowering position.

2007-2010 - 3.19.4.4 Manual Lowering Valve. A manually operated valve, located on or adjacent to the control valves, shall be provided and identified, which permits lowering the car at a speed not exceeding 0.10 m/s(20 ft/min). This valve shall be so marked to indicate the lowering position.

Where the hydraulic machine is located in the hoistway, the manual lowering valve shall only be accessible to elevator personnel from outside the hoistway (see 8.1).

Requested deviation:

The manual lowering valve is replaced with electronically assisted valve operated by a constant pressure key switch located in the service panel. The service panel is located at the 2nd landing and accessible from outside the hoistway. The service panel is accessible only by Type 1 security.

There is a "stop" switch, located in the service panel, which is required to activate the manual lowering valve. The key switch must be keyed to the down position in order to activate manual lowering. These precautions ensure safe operation of the valve.

Deviation 3
Pressure Gauge Fitting
Code

2004 - 3.19.4.5 Pressure Gauge Fittings. A pressure gauge fitting with shutoff valve shall be provided on jack side of the check valve or immediately adjacent to the hydraulic control valve.

2007-2010 - 3.19.4.5 Pressure Gauge Fitting. A pressure gauge fitting with shutoff valve shall be provided on jack side of the check valve or immediately adjacent to the hydraulic control valve. Where the hydraulic machine is located in the hoistway, the pressure gauge fittings shall only be accessible to elevator personnel from outside the hoistway (see B.1).

Requested deviation:

System pressure monitoring is accomplished via an electronic pressure monitoring arrangement.

This monitoring arrangement provides an electronic pressure transducer (on the jack side of the check valve) with remote LCD display located at the 2nd landing service panel accessible from outside of hoistway.

This LCD display shows system pressure directly eliminating the need for a hydraulic pressure fitting. If the LCD is used for another function, the display will revert back to displaying system pressure after 30 minutes. The service panel is accessible only by Type 1 security.

Deviation 4
Pressure Switch3.26.8
Code

2004-2010 - 3.26.8 Pressure Switch When cylinders are installed with the top of the cylinder above the top of the storage tank, a pressure switch shall be provided in the line between the cylinder and the valve, which shall be activated by the loss of positive pressure at the top of the cylinder. The switch shall prevent automatic door opening and the operation of the lowering valve or valves. The door(s) shall be permitted to open by operation of the in-car open button(s), when the car is within the unlocking zone.

Requested deviation

The pressure switch function is included with system pressure monitoring.

The MRL Hydro design is provide with an electronic pressure transducer (on the jack side of the check valve) with remote LCD display located at the 2nd landing service panel accessible from outside of hoistway.

The service panel is accessible only by Type 1 security. When system pressure drops below 45 psi, the pressure transducer signal is processed to stop the operation of the lowering solenoid. If system pressure is restored to above 60 psi, the system will resume normal operation.

LIFTINSTITUUT

CERTIFICATE OF CONFORMANCE

Acting under ASME A17.7 / CSA B44.7.1 issued by Liftinstituut B.V.
Identification number ANSI AECO #0842
(AECO = Accredited Elevator/Escalator Certification Organization)
Certification system 3 according to ISO Guide 67: 2004

| | | | | |
|---|---|--|---------------|---|
| Certificate no. | : | NA13-0842-1004-015-01 | Revision no.: | - |
| Description of the product : | | Remote shut-off valve, remote pressure monitoring, Remote lowering valve, and electronic low pressure detection | | |
| Type : | | ThyssenKrupp, MRL Hydro | | |
| Model no. : | | Endura | | |
| Name and address of the manufacturer : | | ThyssenKrupp Elevator Americas 9280 Crestwyn Hills Drive Memphis, TN 38125 USA | | |
| Name and address of the certificate holder : | | ThyssenKrupp Elevator Americas 9280 Crestwyn Hills Drive Memphis, TN 38125 USA | | |
| Certificate issued on the basis of the following requirements : | | ASME A17.7-2007 / CSA B44.7-07 (1-3 Sub Systems) | | |
| Test location : | | ThyssenKrupp Elevator Americas 6266 Hurt Rd Horn Lake, MS 38637-2306 USA | | |
| Date and number of the laboratory report : | | None | | |
| Date of verification of conformance : | | January 2013 – August 2013 | | |
| Annexes with this certificate : | | Certificate of Conformance Report no: NA13-0842-1004-015-01 | | |
| Additional remarks : | | For GESRs, SPs and other information see supporting report. | | |
| Conclusion : | | The Sub System meets the requirements of the ASME A17.7-2007 / CSA B44.7-07, taking into account any additional remarks mentioned above. | | |
