

Owl Craft – Make an owl magnet

Supplies

- Liquid glue
- A flat piece of craft magnet
- Two complete halves of a walnut shell

Directions

1. Collect two complete halves of a walnut shell.
2. Cut the magnet to fit the flat side of one half.
3. Glue it in place and turn face down to dry.
4. Place the other half (the head and face of owl), inside surface facing up, above the first piece. Glue the two parts together; making sure the “heart” shape is right side up. Allow them to dry.
5. Enjoy the magnet either on your refrigerator or inside your school locker.
