

LIVE WEBINARS

IGIC and GIO in partnership with Indiana Chapters of NENA & APCO are hosting two 1 hour, virtual education opportunities

GIS Basics for the 911 Center - Part 1 May 4th – 10 AM to 11 AM ET

GIS plays an essential role in 9-1-1 systems, and for the public safety professional, that can be intimidating. NG9-1-1, CAD, mapping, and emergency response routing all rely on GIS data. The goal of the session is to break down GIS for the public safety professional, talk about how GIS is used today and tomorrow, and why it is important to understand and value GIS.

GIS Basics for the 911 Center - Part 2 May 18th – 2 PM to 3 PM ET

GIS isn't new to the PSAP. Many have been using it to support CAD and 9-1-1 mapping for several years. So, what's the big deal about GIS for Next Generation 9-1-1? This session will discuss the difference between today's 9-1-1 and NG9-1-1, the new role of GIS, and why it is important for Public Safety and GIS professionals to work together to build NG9-1-1 GIS.
