

# TACTICAL ENERGETIC ENTRY SYSTEMS

"TRAIN FOR THE WORST CASE SCENARIO"

The aim of this course is to introduce or further up-skill Law Enforcement personnel in all facets of mechanical, thermal, power tool, hydraulic ballistic and explosive breaching techniques. This intense course will be broken into modules and conclude with realistic and testing scenarios. Students will be required to demonstrate their individual competencies during each facet of the course.

**LAW ENFORCEMENT TOTAL  
BREACHING COURSE  
MARCH 15-22 2024  
TERRE HAUTE, IN  
\$2125**

A strong emphasis will be placed on the officer's ability to correctly analyze a target then determine the correct method of entry for gaining a positive breach.

On successful completion of this course, the students will possess the knowledge to correctly identify the most suitable method of entry for a given target and the skill to conduct a 100% positive breach.
